

Fund Update

Fisher Funds Managed Funds New Zealand Growth Fund

For the quarter ended: 30 September 2017

This fund update was first made publicly available on: 10 November 2017

This is a replacement fund update, which replaces the 30 September 2017 fund update made publicly available on 30 October 2017. An update has been made to change the Average annual return fund return. The figure provided used the return of the fund since its inception, however this return should have been the annualised return for the last 10 disclosure years.

What is the purpose of this update?

This document tells you how the New Zealand Growth Fund has performed and what fees were charged. The document will help you to compare the fund with other funds. Fisher Funds Management Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

Description of this fund

Number of investors in the fund	4,519
The date the fund started	1 Aug 1998

What are the risks of investing?

Risk indicator for the New Zealand Growth Fund:

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at ipq.fisherfunds.co.nz/ffmf.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the past 5 years. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the [product disclosure statement \(PDS\)](#) for more information about the risks associated with investing in this fund.

How has the fund performed?

	Average over past 5 years	Past year
Annual return (after deductions for charges and tax)	14.93%	7.55%
Annual return (after deductions for charges but before tax)	15.58%	8.19%
Market index annual return (reflects no deduction for charges and tax)	15.64%	7.73%

The market index is the S&P/NZX50 Gross Index excluding imputation credits. Additional information about the market index is available on the offer register at companiesoffice.govt.nz/disclose under Fisher Funds Managed Funds or OFR10667.

Annual return graph

This shows the return after fund charges and tax for each of the last 10 years ending 31 March. The last bar shows the average annual return for the last 10 years, up to 30 September 2017.

Important: This does not tell you how the fund will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower. The market index return reflects no deduction for charges and tax.

What fees are investors charged?

Investors in the New Zealand Growth Fund are charged fund charges. In the year to 31 March 2017 these were:

	% of net asset value
Total fund charges	2.35%
Which are made up of:	
Total management and administration charges	2.35%
Including :	
Manager's basic fee	1.27%
Other management and administration charges	0.27%
Total performance-based fees ¹	0.81%

Small differences in fees and charges can have a big impact on your investment over the long term.

Example of how this applies to an investor

Katie had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Katie received a return after fund charges were deducted of \$755 (that is 7.55% of her initial \$10,000). Katie did not pay other charges. This gives Katie a total return after tax of \$755 for the year.
